End of Year Activities

Kindergarten – 2nd Grade:

Ask your students to color the image. Then use the image to answer each question.

1. Everyone in the picture needs 1 pair of sunglasses, 2 cookies and 5 chicken nuggets. How much of each is needed?

2. At the end of the year party the teacher buys snacks. Each student gets 2 pieces of pizza, each pizza has 10 slices. How many pizzas should the teacher buy if there are 24 students in the class? Use words and numbers to support your answer.

3. Today we tie-dyed shirts for our end of year party. We finished at 3:15 p.m. The directions say to let the dye set for 6 $\frac{1}{2}$ hours before washing the shirt. What time should I take my shirt out of the bag and wash it? Use words and numbers to support your answer.
