

3rd – 5th Grade
Fall Leaves

1. Luke raked leaves for 2 hours and 15 minutes. Brian raked leaves for 80 minutes. How many more minutes did it take Brian to rake the leaves than it did for Luke to rake his leaves? Use words and numbers to support your decision.

2. Violet has raked the leaves in her yard into one large pile. The pile is 8 feet long, 4 feet wide and 2 feet deep. It is recommended that a leaf pile needs to be at least 4 feet deep to be safe for children to jump into it. Describe how Violet can rearrange her leaf pile, so it is safe for her and her siblings to jump into the pile. Use words and numbers to support your answer.

3. Breanna is creating leaf stringers to decorate her front door. She needs 8 leaves for every 6 inches of stringer. The stringer needs to be 10 feet long. How many leaves does Breanna need? Use words and numbers to support your answer.
