

3rd – 5th Grade
Trick or Treat

1. Nate has 320 pieces of candy from trick or treating. His parents say he can only have 5 pieces of candy each day. Nate claims that his candy will last past New Years Day. Do you agree or disagree with Nate's claim? Use words and numbers to support your answer.

2. Abi and Kai are sisters. After trick or treating, they combine their treats into one pile. Then they take turns selecting their favorite treats. This year they have a total of 535 pieces of candy. Abi wants the largest candy bar and is willing to only take 260 pieces leaving Kai with the rest. Is this fair? Use words and numbers to support your decision.

3. Angie and Rubio have 2 hours to trick or treat. Together they collected an amazing 630 pieces of candy. What is the average number of pieces of candy per minute of trick or treating? Use words and numbers to support your answer.
